

SOLAR A2 COPYMASTER FLEXSCAN

The Solar A2 Copymaster - Flexscan is a flexible solution for multiple applications. The copy base accepts a wide variety of original material from flat documents and books through to photographs, paintings and solid objects.

Most cameras with a standard tripod thread can be fitted. Lighting is provided by lights on adaptable arms which can be adjusted for the optimum illumination.

For books a choice of book cradle options help present a flat image to the camera or lend support to tightly bound books which cannot be fully opened.

Specifications

Copy base
