

PORTABLE A4 OVERHEAD SCANNER

The A4 portable scanner is an overhead scanner designed to fit neatly upon a desk. When not in use the scanner can be conveniently folded and stored away in a drawer. The scanner's minimal weight makes it an ideal laptop companion for the travelling researcher.

Capturing at a rate of 1 second per A4 document the bundled software enables saving in multiple formats and as standard includes OCR translation. The software links seamlessly with standard word processor and spreadsheet software together with direct transmission via email.

Specifications

Image resolution

5mp (2592 x 1944)
